Product Rationalization – DIMETCOTE® 11

Dear Valued Customer,

We are writing you to advise you the phase out of *DIMETCOTE 11* in the EMEA region.

DIMETCOTE 11 is a one component inorganic zinc silicate coating. SIGMAZINC™ 19 can be used as alternative for repair of a galvanic layer or inorganic zinc silicates at ambient temperatures. When exposed at elevated temperatures up to 400C, DIMETCOTE® 9 can be used as alternative.

The phase out of *DIMETCOTE 11* is targeted for November 2023.

If you would like to discuss any aspect of this deletion in more detail, do not hesitate to contact your local sales representative or technical sales support representative.

Yours Faithfully

A handwritten signature in black ink, appearing to read 'Mathieu', with a horizontal line extending to the right.
